

LIST OF COMMONLY AVAILABLE NSAIDS AND COX-1 INHIBITORS TO AVOID

Patients with suspected aspirin or non-steroidal anti-inflammatory drug (NSAID) allergies should completely avoid all medications that may inhibit the COX-1 enzyme, until further evaluation by an allergy expert.

The list below details most commonly available COX-1 inhibitors in the United States – the generic drug name in **bold**, followed by most of the brand names in *italics*. All of these medications should be avoided. Please read all medication labels, and check with your healthcare providers to ensure that you are not mistakenly given a prescription for a medication listed below.
